

NAME THAT TREE

Let's learn about leaves! Leaves are the food factories for trees and give off oxygen during the process. Trees provide cooling shade because of all of their leaves. Looking at leaves is also an important way that we can identify trees since they come in different shapes.

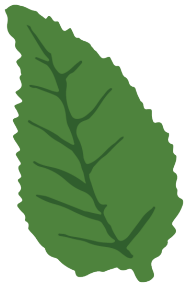

Look for these leaf shapes at Jenkins or in your own backyard. Remember, don't pick leaves off of plants but you're welcome to pick up leaves that have fallen on the ground.

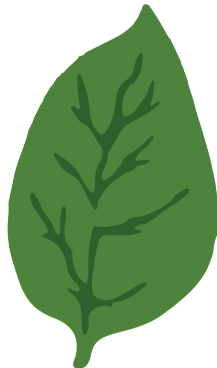

HEART-SHAPED
Redbud

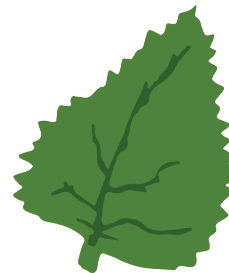

STAR-SHAPED
Sweetgum

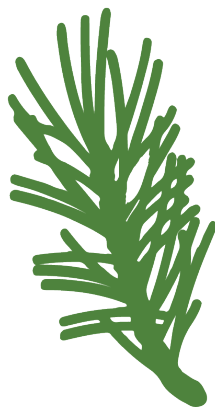

EGG-SHAPED
Birch
